Which portion(s) (i.e. drainage basins) of the site have had a temporary or permanent cessation of grading, earthwork, or ground disturbance in the last 14 days?

Rough grading began on site (6/29/21). Began shaping PCSMP basin (7/20/21). Sanitary installation began on site (8/24/21). Paving on southern part of the site (9/21/21). Storm sewer installation began on site (9/28/21). Grading and sidewalk installation (12/14/21).

/hich portion(s) (i.e. drainage basins) of the site do not have grading, earthwork, or ground disturbance scheduled in the next 14 days?

Rough grading began on site (6/29/21). Began shaping PCSMP basin (7/20/21). Sanitary installation began on site (8/24/21). Paving on southern part of the site (9/21/21). Storm sewer installation began on site (9/28/21). Grading and sidewalk installation (12/14/21).

What temporary or permanent stabilization measures listed in this section are being implemented?

Existing vegetation (6/29/21)

Checklist Questions:

Are receiving waters adjacent to the project free of any significant signs of erosion or sediment that would be associated with the construction activity?

Create Corrective Action?

N/A

Have disturbed areas been seeded or otherwise stabilized as required? List inactive portions of the project and if stabilization measure are adequate or needed to prevent erosion

Create Corrective Action?

N/A

Are waste materials (concrete, construction material, hazardous, etc.) being managed properly?

Create Corrective Action?

No - See Findings Section

Are construction entrances and adjacent streets being maintained adequately?

Create Corrective Action?

N/A

Is dust associated with the construction activity adequately controlled on the site?

Create Corrective Action?

Comments:

- 1.) Site was active for building construction during the last inspection.
- 2.) Rich Engdahl began shaping the PCSMP basin on the western portion of the site during the inspection on 7/20/21.

- Findings / Corrective Actions (Date):
 Findings / Corrective Actions (Date):
 1.) Some maintenance is required in the BMP section.
- 2.) Windblown litter was observed south of the building during the 2/8/22 inspection. All litter and construction debris should be cleaned up around the site. Rich Engdahl was informed by phone to complete by 2/15/22. Rich Engdahl cleaned up some trash and debris prior to the 2/15/22 inspection. Litter remains on site.
