Checklist Questions:						
	the project free of any significant	t signs of erosion or sed	iment that would be associated with	the construction activity	v?	
No					·	
Create Corrective Action?						
No, see BMPs section (Sed	liment Basins)					
	ed or otherwise stabilized as requ	uired? List inactive portion	ons of the project and if stabilization	measure are adequate o	or needed to prevent erosio	
No						
Create Corrective Action?						
No, see Findings section.						
Annual and a state to the second	and model and a start of a second		nodu2			
	construction material, hazardous,	etc.) being managed pro	periy?			
No Create Corrective Action?						
Create Corrective Action? No, see BMPs and Findings	section					
No, see Divir's and Findings						
Are construction entrances and	adjacent streets being maintained	d adequately?				
No						
Create Corrective Action?						

Create Corrective Action?

No, see BMPs section.

Is dust associated with the construction activit	y adequately controlled on the site?

Yes Create Corrective Action?

N/A

IN/A

Comments:

Comments: Site was active for homebuilding during the most recent inspection.

Findings / Corrective Actions (Date): Findings / Corrective Actions (Date):

1) Some maintenance is required in the BMP section of this report.

2) All inactive areas of the site that have no planned ground disturbance within 14 days need to be stabilized.

A. Overgraded lots during homebuilding need to be stabilized. All builders were informed to complete by 1/17/20 when weather allows and as-needed. Not done as of the last inspection. All builders were reminded on 5/19/20, 6/20/20, 8/5/20, 2/25/21, 7/1/21.

B. Void areas south of Camelback Ave need to be stabilized and erosion at the southwest section of the wetland needs to be repaired and stabilized. Gene Graves was informed to complete by 6/1/20. Not done as of the last inspection. Gene Graves was reminded on 6/12/20. Void areas along the south of Camelback have been removed as of the 9/9/20 inspection due to active grading of the property to the south. Gene Graves was reminded on 3/3/2021, 4/23/21, 7/1/21.

C. Lots 56, 57, and parts of 58 need to be stabilized after removal of the concrete washout. Gene Graves was informed to complete by 3/15/2021 when conditions allow. Not done as of the last inspection. Gene Graves was reminded on 4/23/21, 7/1/21. As of 3/15/21, the concrete washout is not going to be moved per FoleyShald Engineering, stabilization is still recommended in the surrounding area.

D. Disturbed areas behind Lot 90 in the wetland area were observed during the 4/13/21 inspection. Gene Graves/Joseph Foley were informed on 4/13/21. Not done as of the last inspection. Gene Graves/Joseph Foley were reminded on 7/1/21. This does not represent a secondary stabilization finding for the construction stormwater report. The engineering firm will address this as part of wetland mitigation.

3) Trash dumpsters on site need to be emptied if they are above the fill line and trash needs to be picked up to prevent trash and debris from blowing around the site. All builders were informed to complete by 2/12/20. Not done as of the last inspection. All builders were reminded on 5/19/20, 6/20/20, 8/5/20, 2/25/21, 7/1/21.

A. Trash needs to be picked up around the site. Gene Graves was informed to complete by 5/25/20. Not done as of the last inspection. Gene Graves was reminded on 6/12/20, 12/4/20, 3/3/21. Trash was not observed during the 6/29/21 inspection in the wetland area, partially due to vegetation growth.
