Checklist Questions:							
Are receiving waters adjacent to th	e project free of any significant s	signs of erosion or sedimen	It that would be associated with t	he construction activity?			
No							
Create Corrective Action?							
No, see BMPs section.							
Have disturbed areas been seeded	or otherwise stabilized as requir	ed? List inactive portions of	of the project and if stabilization m	neasure are adequate or ne	eded to prevent erosion.		
No							
Create Corrective Action?							
No, see Findings section.							
Are waste materials (concrete, con	struction material bazardous of	c ) being managed property	12				
No	Sa asaon material, nazaruous, et	s., seing manageu property					
Create Corrective Action?							
No, see BMPs and Findings s	ection.						
Are construction entrances and ad	jacent streets being maintained	adequately?					
NO Create Corrective Action?							
No, see BMPs section.							
Is dust associated with the constru	ction activity adequately control	led on the site?					
Yes							
Create Corrective Action?							

N/A

## Comments:

Comments: Site was active for homebuilding during the most recent inspection.

## Findings / Corrective Actions (Date)

Findings / Corrective Actions (Date):

1) Some maintenance is required in the BMP section of this report.

2) All inactive areas of the site that have no planned ground disturbance within 14 days need to be stabilized.

A. Void areas south of Camelback Ave need to be stabilized and erosion at the southwest section of the wetland needs to be repaired and stabilized. Gene Graves was informed to complete by 6/1/20. Not done as of the last inspection. Gene Graves was reminded on 6/12/20. Void areas along the south of Camelback have been removed as of the 9/9/20 inspection due to active grading of the property to the south. Gene Graves was reminded on 3/3/2021, 4/23/21, 7/1/21, 9/2/21, 12/2/21, 2/11/22.

B. Lots 56, 57, and parts of 58 need to be stabilized after removal of the concrete washout. Gene Graves was informed to complete by 3/15/2021 when conditions allow. Not done as of the last inspection. Gene Graves was reminded on 4/23/21, 7/1/21, 9/2/21, 12/2/21, 2/11/22, 11/11/22, 4/21/23. As of 3/15/21, the concrete washout is not going to be moved per FoleyShald Engineering, stabilization is still recommended in the surrounding area. Lot 58 was sodded prior to the 1/4/22 inspection. Lot 57 was seeded and matted as part of the Cornhusker Road project prior to the 10/4/22 inspection.

C. Disturbed areas behind Lot 90 in the wetland area were observed during the 4/13/21 inspection. Gene Graves/Joseph Foley were informed on 4/13/21. Not done as of the last inspection. Gene Graves/Joseph Foley were reminded on 7/1/21. This does not represent a secondary stabilization finding for the construction stormwater report. The engineering firm will address this as part of wetland mitigation.

Unique Name	Туре	Location	Projected Install Date	Status	Maintenance
AI 1	Area Inlet Protection	See SWPPP	· · · · · · · · · · · · · · · · · · ·	Removed	
Current Condition:	Removed - Commercial S	eeding removed the inle	t protection prior to the 4/23/2	0 inspection. Inlet dra	ains to SB 2, to prevent
