Comments

Comments: Site was active for homebuilding during the most recent inspection.

Some BMPs could not be verified due to snow cover during the 1/31/24 inspection.

Findings / Corrective Actions (Date): Findings / Corrective Actions (Date):

1) Some maintenance is required in the BMP section of this report.

2) Disturbed area on the side and rear of lot 26 and Cornhusker ROW should be seeded and matted. PHI, LLC was informed to complete by 8/23/23. Not done as of last inspection. PHI, LLC was reminded on 10/5/23, 10/26/23

3) CIR #20971 was received, reviewed, and forwarded on to all builders on 1/4/24. CIR is mostly consistent with E&A findings. CIR is requesting that inlet filters should be cleaned out. Inlet filters are not at capacity and due to winter conditions will not be cleaned out till Spring.
