Construction Sequencing:

Which portion(s) (i.e. drainage basins) of the site have had a temporary or permanent cessation of grading, earthwork, or ground disturbance in the last 14 days?

Grading completed and entire site seeded prior to 2005.

Entire Site; JC Excavating completed grading Lots 346 through 480 Section II, drainage area 1 and 2 (11/2009).

Entire site is now inactive for major grading activities as of the inspection on 11/20/2013.

Grading for the Clearwater Falls Trail has ceased as of inspection on 12/18/17.

Grading has begun at Clearwater Falls Trail for installation of Storm Sewer on N side of trail. Grading has ceased for storm sewer on N side of trail.

Which portion(s) (i.e. drainage basins) of the site do not have grading, earthwork, or ground disturbance scheduled in the next 14 days?

Grading completed and entire site seeded prior to 2005.

Entire Site; JC Excavating completed grading Lots 346 through 480 Section II, drainage area 1 and 2 (11/2009).

Entire site is now inactive for major grading activities as of the inspection on 11/20/2013.

Grading for the Clearwater Falls Trail has ceased as of inspection on 12/18/17.

Grading has begun at Clearwater Falls Trail for installation of Storm Sewer on N side of trail. Grading has ceased for storm sewer on N side of trail.

What temporary or permanent stabilization measures listed in this section are being implemented?

Paving, dense vegetation and landscaping, Seed and straw mulch over ROW in Northwest quarter of SID (10/08), Sod on various lots (Fall '08), New phase, lots 346-480, seeded (4/10); Outlot B was seeded (6/2011); Lots 16-19 was seeded (8/2011); Outlot L was graded, seed and matted (5/22/2014); 42nd Street and 43rd Avenue was temp seeded (5/22/2014); Additional matting was installed on the South side of Outlot L (8/4/2014); Matting has been installed on the side slopes surrounding outlot M Basin (12/15/2014); John Navarro installed the erosion control matting 1 & 2 for the trail project (1/17/18). Park Area has been seeded and matted (5/9/18). Storm Sewer Installed and disturbed area has been seeded and matted (5/9/18). Area surrounding new sidewalk in NE portion of site has been seeded and matted (7/5/18). NW corner of site has been seeded and matted (7/5/18).

Checklist Questions:

Are receiving waters adjacent to the project free of any significant signs of erosion or sediment that would be associated with the construction activity?

Yes

Create Corrective Action?

N/A

Have disturbed areas been seeded or otherwise stabilized as required? List inactive portions of the project and if stabilization measure are adequate or needed to prevent erosion

Yes

Create Corrective Action?

N/A

Are waste materials (concrete, construction material, hazardous, etc.) being managed properly?

Yes

Create Corrective Action?

N/A

Are construction entrances and adjacent streets being maintained adequately?

Yes

Create Corrective Action?

N/A

Is dust associated with the construction activity adequately controlled on the site?

Yes

Create Corrective Action

N/A

Comments:

Comments:

The rain inspection for the rain event on 5/30 (0.53") was performed on 6/02.

Home Construction is inactive as of the last inspection. There is currently 0 active lots and 2 vacant lots (147 & 163) throughout the development.

Outlot J was disturbed when construction equipment used it to access lot 279.

Findings / Corrective Actions (Date):

Findings / Corrective Actions (Date):

- 1.) No maintenance is required in the BMP Section.
- 2.) Some re-seeding is necessary throughout the Clearwater Falls Trail project.
- a. The area around the area inlet needs to be reseeded and matted. Commercial Seeding stabilized the area prior to the inspection on 5/7/20.
- b. The erosion in the middle of the trail area needs to be backfilled and reseeded/matted
- c. The northwest corner of the trail needs to be reseeded/matted
- d. The western portion of the trail needs to be overseeded.
- Commercial Seeding was informed to complete as conditions allow on 3/19/19. Not done as of the last inspection. Commercial Seeding was reminded on 5/13/19, 6/5/19. Commercial Seeding completed the pending maintenance prior to inspection on 6/24/19. E&A will continue to monitor for seed growth. Overseeding is required in all areas. Commercial Seeding was informed to complete ASAP on 9/26/19. E&A will monitor. Not done as of the last inspection. As of the inspection on 6/2/20, permanent vegetation has become sufficiently established to prevent erosion throughout the Clearwater Falls Trail Project. The Clearwater Falls Trail project area meets closure requirements and will no longer be inspected along with the Clearwater Falls development. Any BMPs associated with the Clearwater Falls Trail project will subsequently be removed from this report.
