## Construction Sequencing:

Which portion(s) (i.e. drainage basins) of the site have had a temporary or permanent cessation of grading, earthwork, or ground disturbance in the last 14 days?

Grading began in spring 2021; Entire site graded by fall 2021 (3/17/22). Grading in the northeast quarter of the site (5/17/22).

Which portion(s) (i.e. drainage basins) of the site do not have grading, earthwork, or ground disturbance scheduled in the next 14 days'

Grading began in spring 2021; Entire site graded by fall 2021 (3/17/22). Grading in the northeast quarter of the site (5/17/22).

What temporary or permanent stabilization measures listed in this section are being implemented

Existing vegetation (3/17/22). Slope along SW corner of the site seeded / matted in fall 2021 (3/17/22). Area west of Lot 33 and Lot 61 seeded / matted (3/29/22). North side of Silver Lane and east side of Copper Mountain Drive seeded / matted (3/29/22). South side of Silver Lane and west side of Copper Mountain Drive seeded / matted (4/5/22). Rear of Lots 58 - 60 partially seeded / matted (4/5/22). Disturbed area behind Lots 38 - 40 seeded / matted (4/5/22). Lots 34-40 and 59-61 sodded (4/12/22).

Are receiving waters adjacent to the project free of any significant signs of erosion or sediment that would be associated with the construction activity?

Create Corrective Action?

Have disturbed areas been seeded or otherwise stabilized as required? List inactive portions of the project and if stabilization measure are adequate or needed to prevent erosion

Create Corrective Action?

No, see Findings Section

Are waste materials (concrete, construction material, hazardous, etc.) being managed properly?

Create Corrective Action?
No, see BMP Section

Are construction entrances and adjacent streets being maintained adequately?

**Create Corrective Action?** 

# Is dust associated with the construction activity adequately controlled on the site? Create Corrective Action?

## Comments:

#### Comments:

1.) Site was active during the last inspection.

## Findings / Corrective Actions (Date):

- 1.) Some maintenance is required in the BMP section.
- 2.) E&A began inspecting the site on 3/17/22 after being contracted for SWPPP services by Neal Drickey.
  3.) All disturbed areas, located north of active lots, that are not scheduled for imminent work should be temporarily stabilized. Neal Drickey was informed to complete by 3/24/22. Not done as of last inspection. Neal Drickey seeded/matted the ROW on the east side of Copper Mountain Drive prior to the 3/29/22 inspection. Neal Drickey seeded/matted the ROW on the west side of Copper Mountain Drive prior to the 4/5/22 inspection. E&A inspector will continue to monitor. Neal Drickey was reminded on 4/21/22, 5/24/22, 6/24/22
- 4.) The slope in the rear of lots 55 58 should be stabilized. Neal Drickey was informed to complete by 4/26/22. Not done as of last inspection. Neal Drickey was reminded on 5/24/22, 6/24/22

| reminded on 5/24/22, 6/24 | 122   |                                       |  |                              |                          |  |  |

| Current Condition:      | Poor Condition - 10% filled - Neal Drickey installed the sediment basin prior to the 3/17/22 inspection. The E&A inspector painted the cleanout mark on the riser during the 4/19/22 inspection.  The basin should be installed per the SWPPP plan, including a berm around all sides, anti-vortex device, emergency spillway, and properly elevated dewatering holes. |  |   |   |  |  |
