Negus & Son's Construction installed new runs of silt fence along the north side of SB B and the north and south sides of SB A prior to the inspection on 3/09/20. Negus & Son's Construction trenched-in the silt fence near the southeast corner of the site and along the northeast side of SB A prior to the inspection on 4/01/20 (There is a portion of the silt fence northeast of SB A that is undermined due to subsidence around the SB A outfall pipe; see SB A section for recommended maintenance). Ryan Schwarz / Negus & Son's Construction removed the undermined portion of silt fence at the north end of the run and the old silt fence behind the standing silt fence, and retied the new run of silt fence on the southeast side of SB B prior to the inspection on 4/14/20.</p> <ol style="list-style-type: none"> The old runs of silt fence between SB A and SB B should be cleaned out and repaired/reinstalled. The old run of silt fence east of SB B should be repaired, and the silt fence should be reinstalled where removed along the northeast side of SB B. The newer run of silt fence installed between SB A and SB B should be cleaned out / repaired. The silt fence should be repaired/reinstalled where partially removed north of SB B (behind vacant lots; silt fence installation behind active lots is recommended in the section for each lot). The new run of silt fence along the southeast corner of SB B should have t-posts added such that they are spaced every six feet. The silt fence should be backfilled where undermined near the southeast corner of the site. The new run of silt fence directly east of SB A should be properly trenched-in. The new run of silt fence between SB A and the undermined area near the southeast corner of the site should be retied and t-posts should be added such that they are spaced every six feet. <ol style="list-style-type: none"> Negus & Son's Construction was informed to complete by 4/2/19.
