Are construction entrances and adjacent streets being maintained adequately?
Yes
Create Corrective Action?
N/A
Is dust associated with the construction activity adequately controlled on the site?
Yes
Create Corrective Action?
N/A
Comments:
Comments:

The site was inactive during the most recent inspection.

Lot 5 and 6 Replat 1 have been removed from this SWPPP and are covered by PAP-20220310-6351-GP1.

Findings / Corrective Actions (Date):

Findings / Corrective Actions (Date):

1) Some maintenance is required in the BMP section of this report.

2) Inactive areas of the site need to be stabilized. This is a secondary recommendation to the EM called out in the BMP section below. Gene Graves/DEJ were informed to complete by 5/10/22. Not done as of the last inspection. Gene Graves/DEJ were reminded on 5/27/22, 6/10/22. DEJ began seeding during the 7/8/22 inspection. All inactive areas of the site have been seeded as of the 8/29/22 inspection. Remaining areas to be stabilized include interior ROWs, Ponderosa Culvert, and 72nd Street ROW. Stabilization of these areas will begin once ground disturbing activities are complete. Plans to dormant seed and mat remaining disturbed areas listed are being developed and will be implemented after November 1. New dirt work to begin prior to seeding early next week per Sudbeck. Dirt work is complete as of the 12/1/22 inspection, additional finish grading along 72nd Street to be completed in the Spring of 2023. Commercial Seeding has been hired to stabilize the Ponderosa Swale/ROW and the Schram ROW and medians.
