Checklist Questions: Are receiving waters adjacent to th Yes Create Corrective Action? N/A	e project free of any significant	signs of erosion or sedime	nt that would be associated wit	h the construction activity?			
Have disturbed areas been seeded No Create Corrective Action?	or otherwise stabilized as requ	ired? List inactive portions	of the project and if stabilization	n measure are adequate or i	needed to prevent erosion.		
No, see Findings section.							
Are waste materials (concrete, construction material, hazardous, etc.) being managed properly?							
No Create Corrective Action?							
Create Corrective Action? No. see BMPs section.							
Are construction entrances and ad	jacent streets being maintained	adequately?					
Yes							
Create Corrective Action?							

N/A
Is dust associated with the construction activity adequately controlled on the site?
Yes
Create Corrective Action?
N/A

## Comments: Comments:

The site was active for home building during the most recent inspection.

Lot 5 and 6 Replat 1 have been removed from this SWPPP and are covered by PAP-20220310-6351-GP1.

## Findings / Corrective Actions (Date): Findings / Corrective Actions (Date):

1) Some maintenance is required in the BMP section of this report.

2) Disturbed areas of the north side of the Ponderosa Swale should be stabilized and the old silt fence removed when Vestara construction is complete. The inspector will continue to monitor and recommend maintenance when Vestara construction complete as of the 3/6/24 inspection. PRC seeded and matted the area prior to the 9/19/24 inspection, additional stabilization is recommended on the Vestara report. Not done as of the last inspection. PRC and Commercial Seeding informed to complete ASAP on 10/3/24. Commercial Seeding began seeding/matting the area during the 10/10/24 inspection.

SF 1	Silt fence	Northern/Western Perimeter	5/18/2021	Active	No		
Current Condition:	Good Condition - The developer installed the silt fence prior to the 5/18/21 inspection. Sudbeck installed wattles as an extension of the silt fence to the north prior to the 2/2/22 inspection. Sudbeck extended the silt fence to the south along the north side of the entrance prior to the 4/7/22 inspection. TAB repaired/reinstalled the silt fence along 72nd Street prior to the 4/7/22 inspection. TAB repaired/reinstalled the silt fence along 72nd Street prior to the 4/7/22 inspection. The silt fence was removed in multiple locations, including southwest of SB D, for water installation prior to the 6/24/22 inspection. The water contractor removed the silt fence and dijacent to the construction entrance and NW of SB D prior to the 6/30/22 inspection. Sudbeck installed silt fence around the flared end section of SB D prior to the 7/8/22 inspection. Sudbeck installed silt fence along the north side of Schram prior to the 9/12/22 inspection. Sudbeck repaired and extended the silt fence along 72nd Street prior to the 9/19/22 inspection. Commercial Seeding repaired/reinstalled the silt fence at the outfall prior to the 4/2/2/23 inspection. Sudbeck installed additional silt fence along the top of the slope southeast of 72nd and Schram prior to the 6/8/23 inspection. The silt fence at the process of being removed during the 12/13/23 inspection. The silt fence along S 72nd Street south of Schram was in the process of being removed during the 12/13/23 inspection. The silt fence along S 72nd Street south of Schram was in the 37.24 inspection, the only remaining silt fence under this finding is along the top of the slope southeast of 72nd and Schram prior to the 37.20 Street south of Schram was in the process of being removed during the 12/13/23 inspection. The silt fence around the basin outfall was removed prior to the 37.24 inspection, the only remaining silt fence under this finding is along the top of the slope southeast of 72nd and Schram.						
SF 2	Silt fence	Northeastern Perimeter	5/25/2021	Active	No		
Current Condition:	Fair Condition - The developer installed the silt fence prior to the 5/25/21 inspection. Sudbeck reinforced the silt fence with additional posts in the northeast corner of the site. Sudbeck removed the silt fence in upgradient areas and repaired the silt fence in the northeast corner of the site prior to the 4/6/23 inspection. Sudbeck reinstalled the silt fence and new silt fence checks prior to the 6/8/23 inspection. The silt fence was damaged by excessive water from the adjoining property prior to the 6/22/23 inspection, repair is not recommended at this time, remaining control will be addressed during grading of Phase II. T area where the silt fence is located is adequately vegetated as of the 10/12/23 inspection, repair and silt fence maintenance will be conducted during Phase II grading, no pollution concerns at this time.						
SF 3	Silt fence	Southeast Corner		Removed
