E&A - P2018.228.001

N/A
Is dust associated with the construction activity adequately controlled on the site?
Yes
Create Corrective Action?
N/A

Comments: Comments:

The site was active for home building during the most recent inspection.

1.) Lot 5 and 6 Replat 1 have been removed from this SWPPP and are covered by PAP-20220310-6351-GP1.

Findings / Corrective Actions (Date):

Findings / Corrective Actions (Date):

1) Some maintenance is required in the BMP section of this report.

2) Disturbed areas of the north side of the Ponderosa Swale should be stabilized and the old silt fence removed when Vestara construction is complete. The inspector will continue to monitor and recommend maintenance when Vestara construction complete as of the 3/6/24 inspection. PRC seeded and matted the area prior to the 9/19/24 inspection, additional stabilization is recommended on the Vestara report. Not done as of the last inspection. PRC and Commercial Seeding informed to complete ASAP on 10/3/24. Commercial Seeding began seeding/matting the area during the 10/10/24 inspection. As of the 10/17/24 inspection, some areas still need to be stabilized, the inspector will monitor for dormant seeding in November.

Unique Name	Туре	Location	Projected Install Date	Status	Maintenance
CE 1	Construction Entrance	Schram Road		Removed	
Current Condition:	Removed - The entrance connection.	will no longer be used a	s of the 8/29/22 inspection du	e to the completion of	f the Schram Road
