Comments:				
Home construction is the only activity on site.				
The 0.81 inches is from two separate rain event	s of less than a .5 ir	nch an AM shower of .40	inches and lunch time	shower of 0.41 inches.

The 0.81 inches is from two separate rain events of less than a .5 inch an AM shower of .40 inches and lunch time shower of 0.41 inches. This is why there isnt a rain inspection on 6/19/09 on the following report.

Findings / Corrective Actions (Date):

Findings / Corrective Actions (Date):

- 1) There are various pieces of lot level silt fence throughout the site that are undermined and down. Boyer Young to complete maintenance by 6/27/08. Lee Schwendiman requested a maintenance plan for silt fence removal, and it was found that numerous pieces of lot level silt fence can be removed, and the results will be sent to Lee Schwendiman on 10-15-08. If the silt fence is not removed, it still needs to be repaired. Lee Schwendiman was sent a reminder e-mail about overdue maintenance on 3-17-09. Lee Schwendiman stated on 4-14-09 that the silt fence is to be removed soon by Darryl Logeman, and repairs to be made in necessary areas by Nick Wenninghoff. Not completed as of last inspection.
- 2) See BMP section for required maintenance.
- 3) Lot 28 needs silt fence installed at the front of the lot in order to prevent runoff which is collecting at the bottom of the street. MJ Design Build Inc. was informed by voicemail to install silt fence by 6/28/09. Silt fence was installed but it was not properly trenced in. Inspector called and left voicemail that it needed to be trenched in and streets needed to be cleaned still on 7/11/09.
