#### Checklist Questions:

Are receiving waters adjacent to the project free of any significant signs of erosion or sediment that would be associated with the construction activity?

**Create Corrective Action?** 

No. See BMP Section

Have disturbed areas been seeded or otherwise stabilized as required? List inactive portions of the project and if stabilization measure are adequate or needed to prevent erosion.

need

Create Corrective Action?

N/A

Are waste materials (concrete, construction material, hazardous, etc.) being managed properly?

No

Create Corrective Action?

No, See BMP Section.

Are construction entrances and adjacent streets being maintained adequately?

No

**Create Corrective Action?** 

No, See BMP Section

Is dust associated with the construction activity adequately controlled on the site?

Yes

Create Corrective Action?

N/A

## Comments:

#### Comments:

- 1.) Site was active for home building during the most recent inspection. The Rainwood Road project was inactive during the most recent inspection.
- 2.) SB 4 is being partially closed to accommodate the dirt from the grading of the new area as of 11/9/17. The inspector will continue to monitor its effectiveness. The surrounding area is primarily built out so the remaining basin can accommodate the flow coming from the adjacent lots. The basin was working effectively as of the 8/13/18 inspection.
- 3.) Lot 195/Replat 6 Site changed to stage 3 on 6/14/24.
